Principes Directeurs de Parlerpictos

Clientèle cible

Parlerpictos est une banque de pictogrammes élaborée dans le but d'aider les gens de tous âges ayant une incapacité temporaire ou permanente à communiquer oralement. Cette catégorie d'usagers englobe des personnes présentant de la dysarthrie, de l'aphasie, de la dysphasie ou tout autre trouble de la communication d'origine cognitivo-linguistique associées à des conditions neurologiques diverses dont la déficience motrice cérébrale, la déficience intellectuelle ou auditive, les retards de langage, le trouble envahissant du développement, l'autisme, le traumatisme crânien, l'accident vasculo-cérébral ou la démence. Il est aussi recommandé avec les personnes allophones ou analphabètes qui ne maîtrisent pas la langue d'usage.

Parlerpictos est utilisée entre autres dans les milieux de réadaptation et d'éducation, tout particulièrement dans les classes de niveau préscolaire, de langage, d'adaptation scolaire, d'accueil, d'intégration et d'alphabétisation.

Classement du Vocabulaire

Les mots-pictos de **Parlerpictos** ont été classés en 22 catégories distinctes :

1. Alimentation
2. Animaux
3. Corps humain
4. Couleurs
5. Événements et activités
6. Formes géométriques
7. Lettres
8. Lieux
9. Loisirs
10. Métiers
11. Monnaie
12. Mots d'action
13. Mots de la vie quotidienne
14. Mots-outils
15. Nombres
16. Personnes
17. Qualificatifs
18. Temps
19. Transports
20. Vêtements
21. Vie sociale
22. Divers

La section « divers » est subdivisée en 5 sous-catégories

- 22.1. Ne pas : ne fais pas de bruit, on ne passe pas, ne pas jouer avec le feu, etc.
- 22.2. Notions quantitatives : beaucoup, encore, pareil, plus, trop, un peu, etc.
- 22.3. Notions spatiales : à côté, à l'extérieur, autour, dans, derrière, etc.
- 22.4. Notions temporelles : avant, après, l'automne est avant l'hiver, etc.
- 22.5. Syntagmes verbaux : arrêter au feu rouge, bien se conduire, etc.

Graphisme

Dans un souci d'éliminer les difficultés de discrimination figure/fond et de faciliter la perception du pictogramme, le graphisme de chaque pictogramme a été simplifié et le trait a été grossi.

De plus, les pictogrammes ont été conçus de manière à répondre aux besoins de clientèles de tout âge.

Règles de conceptualisation de la Banque pictographique Parlerpictos

1. Le dessin

Généralement,

- Lorsque plus d'une personne figure dans un pictogramme, le dessin de celle qui accomplit l'action est hachuré. Il en va de même pour les dessins qui représentent les pronoms;
- Les mots sont écrits en lettres minuscules et sont au singulier;
- Les pictogrammes représentant un lieu (banque, etc.) sont encadrés du schéma d'une maison.

La flèche n'est utilisée que si on a besoin d'indiquer une direction ou d'attirer l'attention sur une personne ou un objet en particulier.

Nous avons aussi établi des règles pour les pictogrammes représentant des personnes :

- Les femmes sont identifiées par une robe ;
- Les hommes ne sont représentés que schématiquement ;
- Les personnages n'ont généralement pas de cou ni de cheveux et leur tête est légèrement séparée du corps. Ils ont un cou ou des cheveux lorsque le concept ou la représentation le demande ;
- Les doigts ne sont dessinés que s'ils sont nécessaires ;
- Les pieds sont esquissés en forme de botte ;
- Les personnes représentant une profession sont illustrées soit par leur costume ou par le décor de leur milieu de travail.

2. La couleur

Le **Parlerpictos** couleur a été inspiré des catégories sémantiques utilisées dans le système Bliss :

Personne	jaune
Action	vert
Chose	orangé
Qualificatif	bleu
Temps	blanc/gris

Deux sous-catégories ont été ajoutées :

Mot-outil	mauve
Vie sociale	rose

Pour certaines catégories, la couleur réelle de l'objet représenté a été privilégiée (p. ex.: aliments et animaux).

Un même picto peut être colorié de façon différente selon le mot qu'il représente. Par exemple lorsqu'on évoque le métier de coiffeur, le personnage qui le représente est de couleur jaune. Lorsqu'on désigne l'action de coiffer, le coiffeur est colorié en vert.

Lorsqu'il y a plus d'une personne dans le pictogramme, c'est généralement la personne qui fait l'action qui porte la couleur établie de cette catégorie.

Parfois, lorsque plusieurs éléments sont rassemblés dans un même pictogramme, on utilisera une des couleurs établies pour mettre en relief l'élément ciblé.

Dimension des pictogrammes

Parlerpictos offre des pictogrammes de différentes dimensions :

2 cm - 3 cm - 5 cm - 8 cm - 10 cm - 12 cm - 20 cm

Pour un premier tableau de communication et pour les personnes ayant un trouble vision ou des difficultés de coordination, on suggère de créer le tableau de communication avec des pictogrammes de 5cm. Cette dimension facilite le repérage et la reconnaissance.

Lorsque nous travaillons avec des gens qui utilisent un pointeur (manuel ou frontal) les diverses grandeurs permettent d'ajuster le niveau de difficulté du pointage à la qualité du contrôle moteur de l'utilisateur.

Choix des pictogrammes

Cette étape doit se faire le plus souvent possible en collaboration étroite avec l'utilisateur et les membres de son entourage. Il est important de faire une bonne évaluation de ses activités de la vie quotidienne. Il faut respecter les goûts, les besoins et les intérêts de la personne. Au début, il serait préférable de limiter le nombre de pictogrammes. On devrait commencer par ses besoins de base ainsi que ses demandes les plus fréquentes.

Règles à appliquer

Il est intéressant de plastifier chaque tableau. De plus, il existe de petits carnets conçus spécialement à cette fin. Un individu peut posséder plusieurs tableaux surtout du type thématique comme par exemple un pour le restaurant, un pour l'école ou le travail, un pour la maison, etc.

Afin de faciliter l'apprentissage des concepts de temps, les pictogrammes peuvent être très intéressants pour élaborer des horaires ou des calendriers visuels.

Conseils pédagogiques :

1. Personnalisation des pictogrammes à partir de la version noir et blanc :

Nous encourageons l'utilisation de la couleur pour aider la compréhension ou pour personnaliser un tableau ou un horaire. Un logiciel à dessins permet d'ajouter la couleur aux pictogrammes de **Parlerpictos**.

Exemples :

- La voiture familiale
- Le manteau de l'enfant
- La nourriture

Pour ce qui est de la représentation des ethnies, il s'agit de prendre des personnages et d'utiliser la couleur qui s'apparente le plus à la couleur de la peau.

L'utilisation de trop de couleurs dans un pictogramme ou dans un tableau de communication peut nuire à la compréhension. De plus, les couleurs fluorescentes sont déconseillées. IL EST IMPORTANT de ne pas utiliser de la couleur de façon insolite, comme mettre le front d'un personnage en vert ou en rouge vif pour exprimer qu'il est malade ou qu'il a mal.

Certains pictogrammes qui représentent un concept comme par exemple après (après avoir peinturé) sont mieux compris s'ils sont en couleur.

Si on fait référence à un logo, il faut en utiliser la couleur.

Exemples :

- Logo de signalisation (main en rouge)
- Logo commercial (M de McDonald's en jaune)

Après avoir expérimenté plusieurs façons de colorier les pictogrammes, nous avons constaté que les tableaux coloriés au crayon feutre sont plus attrayants et résistants que les tableaux coloriés au crayon à la mine. Les couleurs ternes telles le brun, le gris, le vert sombre, etc., sont à éviter.

2. Disposition des pictogrammes dans un tableau

Il y a deux principaux types de tableaux : les tableaux thématiques et les tableaux construits par groupes lexicaux. Il est intéressant par ailleurs de faire participer l'utilisateur à la préparation de son tableau de communication. Il sera ainsi plus motivé à l'utiliser et en connaîtra mieux les différentes composantes. Lors de l'élaboration d'un tableau par groupes lexicaux, il faut respecter les conventions relatives à la couleur :

Personne	jaune
Action	vert
Chose	orangé
Qualificatif	bleu

Parlerpictos représente l'outil idéal de référence pour différents systèmes tel que TEACCH.

On peut utiliser les pictogrammes pour travailler la structure syntaxique, le vocabulaire et la compréhension des consignes.

Il peut y avoir plusieurs autres applications, mais nous vous avons présenté les plus courantes.

L'organisation spatiale du tableau :

Les pictos peuvent être regroupés par thèmes (ex : au restaurant) ou en respectant la syntaxique de la phrase.

Nous proposons ici « la clé de Fitzgerald» qui est aussi celle proposée par le système Bliss.

Personnes et êtres vivants	Verbes	Prépositions articles conjonctions	Adjectifs adverbes	Objets	Lieux	Temps	Formules de politesses *

Pour plus de détails sur l'organisation des tableaux, se référer au document : Guide d'intervention en communication non orale publié par CSCOE.

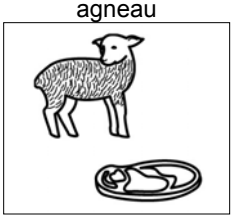

* cette section peut aussi se placer au début du tableau dans la colonne de gauche
